

Demonstration of Proposed Features

Date	02 July 2026
Team ID	SWTID-2026-4638
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the planning and design phase of the Credit Card Approval Prediction System and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to develop, integrate, test, and deliver the proposed machine learning solution according to the project objectives.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Credit Card Approval Prediction	Predicts whether a credit card application is likely to be approved using a Random Forest model	Implemented	Yes	Working successfully
2	Data Preprocessing	Validates and preprocesses applicant information before prediction	Implemented	Yes	Accurate preprocessing completed
3	Risk Audit Report	Generates a detailed audit report explaining the prediction result	Implemented	Yes	Report generated successfully
4	Prediction History	Stores prediction results in a JSON file for future reference	Implemented	Yes	Prediction logging working correctly
5	Responsive Web Interface	Provides an easy-to-use interface for entering applicant details and viewing results	Implemented	Yes	Fully functional frontend
6	Docker Deployment	Supports containerized deployment for consistent application execution	Implemented	Yes	Successfully deployed using Docker

Feature Implementation Summary:

Particular	Count
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
